

ROOTWELL™

ROOT STARTER STICK

USES:

- Plant nurseries for boxed or balled trees and shrubs
- Containerized plants
- Starter containers
- Décor planters, pots, and tubs
- Smaller shrubs and plants
- Roses
- Indoor plants
- Any other plant health enhancement need.

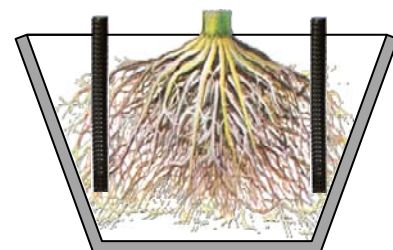

Purpose:

- Keeps plants alive and vibrant
- Provide oxygen rich air to the root mass in confined growing spaces.
- Provide a pathway for water, air, and nutrients to the root mass.
- Provide an environment for the development of biomass in the soil.
- Provide an environment for the growth of Mycorrhizae Fungus.
- Helps plants overcome the choking effects of compacted soils.
- Helps plants develop an immune system.
- Helps plants to be beautiful and productive.

Installation:

- ✓ Cut to length if needed.
- ✓ Prepare soil opening without pressing soil. A spade bit drill works perfectly.
- ✓ Place Root Stick so the top cap is 1" above the soil.
